# SB+SAFETY 100

## Convertible Mattress System

Dual modes of pressure relief and advanced safety features to improve your clinical and financial outcomes.

\* Shown with optional alternating pressure control unit.

The SB+Safety 100 is a convertible, self-adjusting, pressure relieving mattress replacement system providing pressure ulcer prevention/early intervention and fall risk reduction.

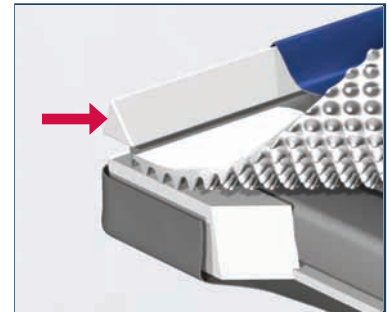

- The patented SB+Safety Perimeter System is built in to the cover to reduce risk of resident falls and entrapment.
- The mattress quickly converts from non-powered to powered with an optional control unit.
- Used non-powered, the SB+Safety 100 provides pressure relief through twelve self adjusting air cells.
- When powered, the mattress supplies alternating pressure for pressure relief.

# SB+SAFETY 100 - Convertible Mattress System

Feature	Benefits
SB Safety Perimeter System built in to cover	Reduces risk of falls and side rail entrapment
12 self-adjusting, foam-filled air cells	Reacts to body movement by shifting air throughout the system for maximum body weight displacement and minimum tissue interface pressure
Optional control unit	Converts easily from non-powered prevention to powered alternating pressure treatment maximizing clinical and economic outcomes
Firm, foam perimeter	Allows for a more safe and stable entry and exit
Non skid bottom cover	Reduces risk of mattress sliding on bed frame
Multi-way stretch polyurethane top cover	Enhances comfort and immersion for improved pressure reduction and is bacteriostatic, fluid proof, tear resistant, cleanable and replaceable
Sloped foot section	Minimizes pressure in heel area
Reinforced handle system	Facilitates movement inside facility with width-wise handles on underside of mattress

**Improving Patient Safety** – foam ridges of patented SB+Safety Perimeter System are built into the mattress top cover, reducing risk of falls and side rail entrapment.

## PRODUCT SPECIFICATIONS

### Mattress

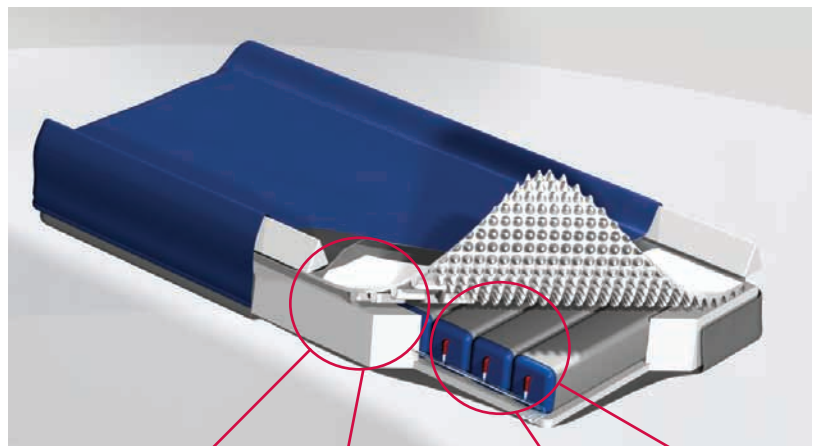

Dimensions.....35" x 80" x 9"  
 (Bariatric and custom mattress sizes available)  
 Weight .....41 lbs.  
 Weight Capacity\*.....500 lbs.  
 Warranty: 5 year limited (3 year non-prorated)

Flammability: Mattress materials meet Cal 117 standards and will meet TB 603 and Cal 129 with optional fire sleeve

### Control Unit

Dimensions .....10.2" x 5.1" x 3.1"  
 Weight .....3.3 lbs.  
 Electrical Rating: 120V~, 60Hz, 5A  
 230V~, 50Hz, 2.5A  
 UL Listing: conforms to UL 1431  
 Warranty: 1 year non-prorated

\*Verify frame capacity with manufacturer

**Safer egress** - Firm foam perimeter allows for a more safe and stable entry and exit

**Self Adjusting air cells** - horizontal air cell system adapts to body movement to maximize weight displacement and minimize tissue interface pressure
